

Senior Capstone Proposal Sheet

Franklin County Technical School

Use this sheet to develop your Capstone Project proposal. Make sure you address each of the components. Meet with your shop instructor to discuss the proposal. Both you and your shop instructor must sign off on the final proposal. (Use additional sheets if necessary)

My Capstone Project title is:

What is the "technical" product that you intend to create as part of your Capstone Project?

Write a brief description of the hands on learning activities that you plan on completing as part of your Capstone Project. Spend some time brainstorming about all of the actions that will be necessary to complete the "doing" phase of this project.

What additional research do you plan to incorporate into your project write up?

Create a list of possible reference materials that you intend to utilize to supplement the documentation of your technical product. This activity can focus on history, engineering, marketing or other information that would be beneficial for developing an understanding of your project by future readers.

Are there any interesting or unique parts of your Capstone Project that involve math, science or other types of technical knowledge?

Identify at least two unique, trade related concepts that you intend to incorporate into your final project write up.

1. _____

2. _____

How will this Capstone Project support your future career goals?

Describe how this project will help you with your transition from F.C.T.S. to your next step in life; work, college, military or technical training.

Write an overview of the Proposed Capstone project.

Provide an explanation of how and why you selected this project.

What skills that you have learned at FCTS will you need to utilize to complete this project?

Develop a list of materials and supplies you will need to successfully complete your Capstone Project. Include estimated amount of materials needed, sourcing of materials and price research. How will this material be provided? (school supplied, outside project, customer, student, etc.)

How long will this project take to complete?

Develop a timeline with your instructor to realistically estimate the amount of shop time you will need to devote to the project.

List any special help or instruction that you will need before beginning this project.

List special tools, equipment or supplies that you will need to acquire to complete this project, and where you plan to obtain them from.
